

**AN INVITATION TO MEMBERS OF THE  
INTERNATIONAL ACADEMY OF CERAMICS FROM  
THE FIRST INDIAN CERAMICS TRIENNALE *BREAKING GROUND 2018***

Members of the International Academy Of Ceramics are cordially invited to visit the first Indian Ceramics Triennale, *Breaking Ground 2018* which opens on the 31st of August 2018 and runs until 18th November 2018, at the magnificent Jawahar Kala Kendra in Jaipur.

45 Indian and international artists, will each present a project that showcases and encourages alternative, experimental, experiential, and site-specific, clay-based practices beyond the confines of the gallery. Through adjunct exhibitions, symposia and a lively program of workshops conducted by eminent artists, it will bring to fore contemporary ceramic practices, encourage audience participation and open new avenues for discourse.

The Jawahar Kala Kendra, with its ample open courtyards and spaces presents an exceptional and inspiring venue. Designed by India's celebrated architect Charles Correa, the site affords an opportunity to work in a variety of scales and a unique architectural context.

A two-day symposium on September 1<sup>st</sup> & 2<sup>nd</sup> will follow the inauguration of the triennale. The symposium provides a platform for critical engagement, debates and discussion of contemporary ceramics, the larger context in which it operates, and its future; we will explore clay in relation to technology, politics, new media and art history.

We look forward to welcoming members of IAC to this first iteration of the Indian Ceramics Triennale, *Breaking Ground 2018* in Jaipur.
