

EVA RODRÍGUEZ PÉREZ

BIOGRAPHY

Eva Rodríguez Pérez is a philologist by training, specializing in Catalan language and literature, and passionate about art, culture and the stimulation of creativity. Throughout her professional career, she has combined language teaching with writing and audiovisual creation in the field of contemporary ceramics, promoting the work of established and emerging artists in contemporary ceramics both nationally and internationally.

With a critical and sensitive perspective, she has contributed to giving visibility to ceramics as a means of modern artistic expression through the publication of articles in international specialized magazines. Her audiovisual works are a means of showing the essence of creative processes and the unique vision of artists who work with ceramics.

Today, her main interest lies in providing a new perspective on the ceramics scene, disseminating and giving voice to the work of artists and exalting contemporary ceramics as a living, modern and significant art form. Currently, she collaborates in the international section of the Terrart magazine of the Association of Ceramists of Catalonia.
