Playing with pieces thrown on a potter's wheel and deforming them on various ways allows me to observe how the clay reacts. By beginning with double-walled pieces or by mixing different kinds of clay or adding elements on the surface, the movement is enhanced. A parallel can be made between my pieces and social interactions and it allows me to a wide expression : it's a game where curiosity and observation are the tools.

Couple, wheelthrown, stoneware. 12 x 9 x 9 cm

Two, wheelthrown sculpted pieces, stoneware. Mural installation, 19 x 40 cm
