

Presents

*“Huellas”* Cinco Motivos y una Causa”

A demonstration and conference by Spanish Ceramic artist

Gerardo Queipo

15th September 2009

**Demonstration.** “Art and Nature” 11.00am-1.00pm

-use of textures as found in Nature especially trees, making "negatives" of textures and its application to volumetric form, construction of forms and decorative techniques with vitrified slips and oxides.

**Conference.** 3.30-5.00pm

“Huellas” are static expressions of the passage of time. It is a project that attempts to establish a dialogue between “Art and Nature”, a communication between beauty as found in Nature and what the artist can create. This search has been translated into objects of immortality. The Centennial Trees found in El Bierzo are the source of inspiration for the artist

As director of “Embarrarte” and The International Ceramics Festival in Ponferrada Gerardo will also discuss the organization and impact the festival has had in promoting such events as internationally acclaimed French artist Michel Moglia’s “Orgues a Feu” , “Arte, Ceramica y La Naturaleza” which is a series of sculptures that are in the campus of the University of Leon in Ponferrada.

Venue:-

Sanskriti Kendra Foundation,  
Anandagram,  
Mehrauli-Gurgaon Road,  
New Delhi - 110047
