# 1. Introduction

## KOREA CERAMIC DESIGN ASSOCIATION

The Korea Ceramic Design Association, which was founded in 1993, has been organizing exhibitions by selecting realistic themes that reflect the times each year, and is making a new ceramics culture that transforms our lives beautifully through the ceramics design.

Until now, we have held numerous exhibitions including domestic and international exchange exhibitions. We have been continuously informing the identity of Korea ceramic design through academic event planning and international exchange such as seminars and symposiums with various ceramic organizations in foreign countries.
