Title : Black & White – Living Object

Date : 2014. 10. 28. – 11. 23

Place : Exhibition room 3, Ceramix Creative Center,  
Icheon Cerapia (Gyunggido, Korea)

In this exhibition, we can see the works of artists from Korea, China, Japan, Taiwan and five European countries at a glance.

In particular, it was intended to show changes in the consciousness and flow of industrial ceramics by focusing on the production and design of ceramics. Also, by matching color codes with black and white colors, which are the colors of Korean culture, the design itself has become more prominent through restrained colors.
