

NÓW

NEW CRAFT
POLAND

2025

We are a group of designer makers and craftspeople who promote handmade items. We come from different parts of Poland and we have different professional backgrounds and experience. We get inspiration from traditional craft, but we do not rigidly stick to ready-made rules of craftsmanship. What we choose is the freedom of experimenting with the form, material and production process.

↑ Making / Things exhibition, Łódź Design Festival, 2019

We spread knowledge about contemporary Polish craft at home and abroad. We represent the interests of craftspeople while dealing with public institutions and business. Together, we make Nów. New Craft Poland – an association of contemporary craftspeople.

↑ Aleksander Oniszh, workshop

Nów. New Craft Poland is a member of Michelangelo Foundation – an international foundation committed to the promotion of craft.

A graduate of the Ceramic and Glass department of the Academy of Fine Art in Wrocław. Laureate of the Young Poland Scholarship Programme awarded by The Polish Ministry of Culture. She has participated in many international exhibitions and symposiums, including England, France, Spain and Italy.

**MONIKA
DĄBROWSKA-PICEWICZ**

Sculpture ↓

MONIKA DĄBROWSKA-PICEWICZ

In her works, she balances between abstract sculpture and functional form. They refer to her natural surroundings, which constantly provide her with shapes and structures. She collects moments of pause in nature and emotions associated with them, then transforms them into the language of matter. An important part of her process is combining techniques and experimenting with materials. By incorporating additional ingredients into the ceramic mass, she discovers its new properties and often achieves surprising results.
