

Events and Activities | 2016 to 2019

The Pottery Museum (since 1995) sustains exhibitions with an specific education/ animation program aiming new audiences and cultural dynamics towards a space of excellence.

We highlight the special programs for International Museum Day celebrations and the European Night of Museums.

The museum created special programs for children and youths, creating bonds between the youngsters and the institution, investing in art education and the maintenance of the clay's craft. The museum developed also a specific program for the adult audiences, based on learning pottery work and tile painting technique, thus building awareness of this craft among the general public.

The Museum joined up in 2017 the Good Morning Ceramic event, an initiative of the European Association of Ceramic Cities. This event aims to advertise the region's representative ceramic products.
