Facebook - Art Ceramics Leith

My artwork usually consists of ceramic sculptures and large vases.

I use stoneware made of earthenware followed by glass technology in different types. Also brushes with oxides such as under glaze, engobe, majolika and different types of glazes that I myself manufacture. I use real gold.

The art I perform is based on imagination, such as connected animals that are part of machines and robots. Several of these fanatical animals are their own creation, such as the lionfish and the rabbit/turtle. I believe that this is a new art style and gives a wide range of imagination and thinking far from reality.

I am an active artist who sells, shows and creates new works of art all the time.

LEITH ABBAS
